Reference: Quote on WalCon ® 3R/3S-CW-3L-RC-SLR-ADA \$129,404.00
delivered to your accessible job site to be unloaded and placed by others.

Jason Simpson
City of Lake Elsinore

Thank you for the opportunity to quote you our restroom /shower building
for this project....La Laguna RV Park

This building delivered to your accessible job site would be \$129,404.00, to be unloaded and placed by others on a prepared building pad built to satisfy the requirements outlined by the owners. The building is delivered as two modules with a separate center roof section which is installed after the two modules have been placed and aligned. The weight of each module would be 62,000 lbs. and does not include the lifting rigging. Enough room must be made available for a properly sized crane and the transport equipment, which delivered this building, to unload and place the building in a in a safe and non-destructive manner. You can see on the drawings the size of the building, but keep in mind the crane company should supply a lifting / spreader bar which should be at least 48" longer than the building depth (front to back). This building is complete and ready to be put into service once final connection to the utilities is made (keep in mind the water lines and waste lines will need to be flushed out at the time the utility connections are made. This price does not include any taxes nor performance / payment bond. Since we are a foreign corporation operating under license NO. MF1197624...Manufacture of Commercial Modular Units we are not authorized to collect taxes for the State of California.

We have included in this price the required fixtures and accessories requested by the owner. We will have a representative on site to receive this building at the time of delivery. He will be there should you have any questions or concerns. Our representative can meet with you at any reasonable time on the job site prior to delivery should you want.

Thanks and good luck on this project,

Robert C. Fischer
