## EXECUTIVE SUMMARY

The City of Lake Elsinore engaged Willdan Financial Services (Willdan) to determine the full costs incurred by the City to support the various activities for which the City charges user fees. Due to the complexity and the breadth of performing a comprehensive review of fees, Willdan employed a variety of fee methodologies to identify the full costs of individual fee and program activities. This report and the appendices herein identifies 100% full cost recovery for City services and the recommended level of recovery as determined through discussion with departmental staff.

The reality of the local government fee environment is that significant increases to achieve 100% cost recovery can often not be feasible, desirable, or appropriate depending on policy direction, particularly in a single year. The recommended fees identified herein are either at or less than full cost recovery.

## USER FEE BACKGROUND

### BACKGROUND

As part of a general cost recovery strategy, local governments adopt user fees to fund programs and services that provide limited or no direct benefit to the community as a whole. As cities struggle to maintain levels of service and variability of demand, they have become increasingly aware of subsidies provided by the General Fund and have implemented cost-recovery targets. To the extent that governments use general tax monies to provide individuals with private benefits, and not require them to pay the full cost of the service (and, therefore, receive a subsidy), the government is limiting funds that may be available to provide other community-wide benefits. In effect, the government is using community funds to pay for private benefit. Unlike most revenue sources, cities have more control over the level of user fees they charge to recover costs, or the subsidies they can institute.

Fees in California are required to conform to the statutory requirements of the California Constitution, Proposition 218, and the California Code of Regulations. The Code also requires that the City Council adopt fees by either ordinance or resolution, and that any fees in excess of the estimated total cost of rendering the related services must be approved by a popular vote of two-thirds of those electors voting because the charge would be considered a tax and not a fee.

### CALIFORNIA USER FEE HISTORY

Before Proposition 13, California cities were less concerned with potential subsidies and recovering the cost of their services from individual fee payers. In times of fiscal shortages, cities simply raised property taxes, which funded everything from police and recreation to development-related services. However, this situation changed with the passage of Proposition 13 in 1978.

Proposition 13 established the era of revenue limitation in California local government. In subsequent years, the state saw a series of additional limitations to local government revenues. Proposition 4 (1979) defined the difference between a tax and a fee: a fee can be no greater than the cost of providing the service; and Proposition 218 (1996) further limited the imposition of taxes for certain classes of fees. As a result, cities were required to secure a supermajority vote in order to enact or increase taxes. Since the public continues to resist efforts to raise local government taxes, cities have little control and very few successful options for new revenues. Compounding this limitation, the State of California took a series of actions in the 1990's and 2000's to improve the State's fiscal situation—at the expense of local governments. As an example, in 2004-05, the Educational Revenue Augmentation Funds ("ERAFF") take-away of property taxes and the reduction of Vehicle License Fees have severely reduced local tax revenues.

In addition, on November 2, 2010, California voters approved Proposition 26, the "Stop Hidden Taxes Initiative", which is aimed at defining "regulatory fees" as a special tax rather than a fee, thus requiring approval by two-thirds vote of local voters. These regulatory fees are typically intended to mitigate the societal and environmental impacts of a business or person's activities. Proposition 26 contains seven categories of exceptions. The vast majority of fees that cities would seek to adopt will most likely fall into one or more of these exemptions.

---

## ADDITIONAL POLICY CONSIDERATIONS

The recent trend for municipalities is to update their fee schedules to reflect the actual costs of certain public services primarily benefitting users. User Fees recover costs associated with the provision of specific services benefiting the user, thereby reducing the use of General Fund monies for such purposes.

In addition to collecting the direct cost of labor and materials associated with processing and administering user services, it is common for local governments to recover support costs. Support costs are those costs relating to a local government's central service departments that are properly allocable to the local government's operating departments. Central services support cost allocations were derived from the City's Cost Allocation Plan.

As labor effort and costs associated with the provision of services fluctuate over time, a significant element in the development of any fee schedule is that it has the flexibility to remain current. Therefore, it is recommended that the City include an inflationary factor in the resolution adopting the fee schedule to allow the City Council, by resolution, to annually increase or decrease the fees.

The City may employ many different inflationary factors. The most commonly used inflator is some form of the Consumer Price Index (CPI) as it is widely well known and accepted. A similar inflator is the implicit price deflator for GDP, which is much like the CPI except that while the CPI is based on the same "basket" of goods and services every year, the price deflators' "basket" can change year to year. Since the primary factor for the cost of a City's services is usually the costs of the personnel involved, tying an inflationary factor more directly to the personnel costs can be suitable if there is a clear method for obtaining said factor.

Each City should use an inflator that they believe works the best for their specific situation and needs. It is also recommended that the City perform this internal review annually with a comprehensive review of services and fees performed every three to five years, which would include adding or removing fees for any new or eliminated programs/services.

## STUDY OBJECTIVE

As the City of Lake Elsinore seeks to efficiently manage limited resources and adequately respond to increased service demands, it needs a variety of tools. These tools provide assurance that the City has the best information and the best resources available to make sound decisions, fairly and legitimately set fees, maintain compliance with state law and local policies, and meet the needs of the City administration and its constituency. Given the limitations on raising revenue in local government, the City recognizes that a User Fee Study is a very cost-effective way to understand the total cost of services and identify potential fee deficiencies. Essentially, a User Fee is a payment for a requested service provided by a local government that primarily benefits an individual or group.

The total cost of each service included in this analysis is based on the full cost of providing City services, including direct salaries and benefits of City staff, direct departmental costs, and indirect costs from central service support. This study determines the full cost recovery fee for the City to provide each service; however, each fee is set at the City's discretion, up to 100% of the total cost, as specified in this report.

The principle goal of the study was to help the City determine the full cost of the services that the City provides. In addition, Willdan established a series of additional objectives including:

- Developing a rational basis for setting fees
- Identifying subsidy amount, if applicable, of each fee in the model
- Enhancing fairness and equity
- Ensuring compliance with State law
- Developing an updatable and comprehensive list of fees
- Maintaining accordance with City policies and goals

The study results will help the City better understand its true costs of providing services and may serve as a basis for making informed policy decisions regarding the most appropriate fees, if any, to collect from individuals and organizations that require individualized services from the City.

## SCOPE OF THE STUDY

The scope of this study encompasses a review and calculation of the user fees charged by the following Lake Elsinore departments and fee groups:

- City Clerk
- Fire
- Community Services
- Building
- Planning
- Engineering
- Vehicle Abatement
- Code Enforcement

The study involved the identification of existing and potential new fees, fee schedule restructuring, data collection and analysis, orientation and consultation, quality control, communication and presentations, and calculation of individual service costs (fees) or program cost recovery levels.

## AIM OF THE REPORT

The User Fee Study focused on the cost of City services, as City staff currently provides them at existing, known, or reasonably anticipated service and staff levels. This report provides a summary of the study results, and a general description of the approach and methods Willdan and City staff used to determine the recommended fee schedule. The report is not intended to document all the numerous discussions throughout the process, nor is it intended to provide influential dissertation on the qualities of the utilized tools, techniques, or other approaches.

## PROJECT APPROACH AND METHODOLOGY

### CONCEPTUAL APPROACH

The basic concept of a User Fee Study is to determine the “reasonable cost” of each service provided by the City for which it charges a user fee. The full cost of providing a service may not necessarily become the City’s fee, but it serves as the objective basis as to the maximum amount that may be collected.

The standard fee limitation established in California law for property-related (non-discretionary) fees is the “estimated, reasonable cost” principle. In order to maintain compliance with the letter and spirit of this standard, every component of the fee study process included a related review. The use of budget figures, time estimates, and improvement valuation clearly indicates reliance upon estimates for some data.

### FULLY BURDENED HOURLY RATES

The total cost of each service included in this analysis is primarily based on the Fully Burdened Hourly Rates (FBHRs) that were determined for City personnel directly involved in providing services. The FBHRs include not only personnel salary and benefits, but also any costs that are reasonably ascribable to personnel. The cost elements that are included in the calculation of fully burdened rates are:

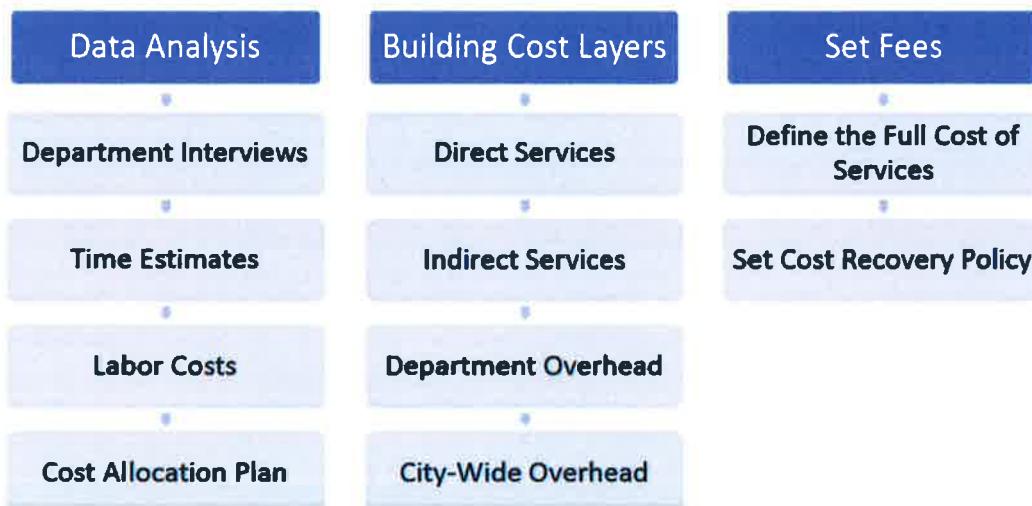

- Salaries & benefits of personnel involved
- Operating costs applicable to fee operations
- Departmental support, supervision, and administration overhead
- Internal Service Costs charged to each department
- Indirect City-wide overhead costs calculated through the Cost Allocation Plan

An important factor in determining the fully burdened rate is in the calculation of productive hours for personnel. This calculation takes the available workable hours in a year of 2,080 and adjusts this figure to account for calculated or anticipated hours’ employees are involved in non-billable activities such as paid vacation, sick leave, emergency leave, holidays, and other considerations as necessary. Dividing the full cost by the number of productive hours provides the FBHR.

The FBHRs are then used in conjunction with time estimates, when appropriate, to calculate a fees' cost based on the personnel and the amount of their time that is involved in providing each service.

## SUMMARY STEPS OF THE STUDY

The methodology to evaluate most User Fee levels is straightforward and simple in concept. The following list provides a summary of the study process steps:

## A ALLOWABLE COSTS

This report identifies three types of costs that, when combined, constitute the fully burdened cost of a service ([Appendix A](#)). Costs are defined as direct labor, including salary and benefits, departmental overhead costs, and the City's central services overhead, where departmental and central service overhead costs constitute support costs. These cost types are defined as follows:

- **Direct Labor (Personnel Costs):** The costs related to staff salaries for time spent directly on fee-related services.
- **Departmental Overhead:** A proportional allocation of departmental overhead costs, including operation costs such as supplies and materials that are necessary for the department to function.
- **Central Services Overhead:** These costs, detailed in the City's Cost Allocation Plan, represent services provided by those Central Services Departments whose primary function is to support other City departments.

## METHODOLOGY

The three methods of analysis for calculating fees used in this report are the:

**Case Study Method (Standard Unit Cost Build-Up Approach):** This approach estimates the actual labor and material costs associated with providing a unit of service to a single user. This analysis is suitable when City staff time requirements do not vary dramatically for a service, or for special projects where the time and cost requirements are easy to identify at the project's outset. Further, the method is effective in instances when a staff member from one department assists on an application, service or permit for another department on an as-needed basis. Costs are estimated based upon interviews with City staff regarding the time typically spent on tasks, a review of available records, and a time and materials analysis.

**Programmatic Approach:** The standard Case Study approach relies upon the detailed analysis of specific time estimates, salaries and benefits, expenditures, and overhead costs. In many instances, the underlying data are not available or vary widely, leaving a standard unit cost build-up approach impractical. In addition, market factors and policy concerns (as opposed to actual costs) tend to influence fee levels more than other types of services. With these general constraints, and to maximize the utility of this analysis, Willdan employed a different methodology where appropriate to fit the programs' needs and goals.

**Valuation Based Fees:** This manner of collection is used when the valuation of the improvement can be used as a proxy for the amount of effort it would take for City staff to complete the service provided. More specifically, this approach is commonly used for certain User Fees in Building.

## QUALITY CONTROL/QUALITY ASSURANCE

All study components are interrelated, thus flawed data at any step in the process will cause the ultimate results to be inconsistent and unsound. The elements of our Quality Control process for User Fee calculations include:

- Involvement of knowledgeable City staff
- Clear instructions and guidance to City staff
- Reasonableness tests and validation
- Normalcy/expectation ranges
- FTE balancing
- Internal and external reviews
- Cross-checking

## REASONS FOR COST INCREASES/DECREASES OVER CURRENT FEES

Within the fee tables, the differences identified between the full costs calculated through the study and the fee levels currently in effect. The reasons for differences between the two can arise from a number of possible factors including:

- Previous fee levels may have been set at levels less than full cost intentionally, based on a policy decisions
- Staffing levels and the positions that complete fee and service activity may vary from when the previous costs were calculated
- Personnel and materials costs could have increased at levels that differed from any inflationary factors used to increase fees since the last study
- Costs that this study has identified as part of the full cost of services may not have been accounted for in a previous study
  - Departmental overhead and administration costs
  - Indirect overhead from the Cost Allocation Plan
- Changes in processes and procedures within a department, or the city as a whole

## CITY STAFF CONTRIBUTIONS

As part of the study process, Willdan received tremendous support and cooperation from City staff, which contributed and reviewed a variety of components to the study, including:

- Budget and other cost data
- Staffing structures
- Fee and service structures, organization, and descriptions
- Direct and indirect work hours (billable/non-billable)
- Time estimates to complete work tasks
- Frequency and current fee levels
- Review of draft results and other documentation

A User Fee Study requires significant involvement of the managers and line staff from the departments—on top of their existing workloads and competing priorities. The contributions from City staff were critical to this study. We would like to express our appreciation to the City and its staff for their assistance, professionalism, positive attitudes, helpful suggestions, responsiveness, and overall cooperation.

## LAKE ELSINORE USER FEES

### COST RECOVERY

The cost recovery models, by department/division fee type, are presented in detail in this report. Full cost recovery is determined by summing the estimated amount of time each position (in increments of minutes or hours) spends to render a service. Time estimates for each service rendered were predominately determined by Willdan and City Staff through a time and materials survey conducted for each department/division fee included in the study. The resulting cost recovery amount represents the total cost of providing each service. The City's current fee being charged for each service, if applicable, is provided in this section, as well, for reference.

It is important to note that the time and materials survey used to determine the amount of time each employee spends assisting in the provision of the services listed on the fee schedule is essential in identifying the total cost of providing each service. Specifically, in providing services, a number of employees are often involved in various aspects of the process, spending anywhere from a few minutes to several hours on the service.

The principle goal of this study was to identify the cost of City services, to provide information to help the City make informed decisions regarding the actual fee levels and charges. The responsibility to determine the final fee levels is a complicated task. City staff must consider many issues in formulating recommendations, and the City Council must consider those same issues and more in making the final decisions.

City staff assumes the responsibility to develop specific fee level recommendations to present to the City Council. Unfortunately, there are no hard and fast rules to guide the City, since many of the considerations are based on the unique characteristics of the City of Lake Elsinore, and administrative and political discretion. However, in setting the level of full cost recovery for each fee, one should consider whether the service solely benefits one end user or the general community.

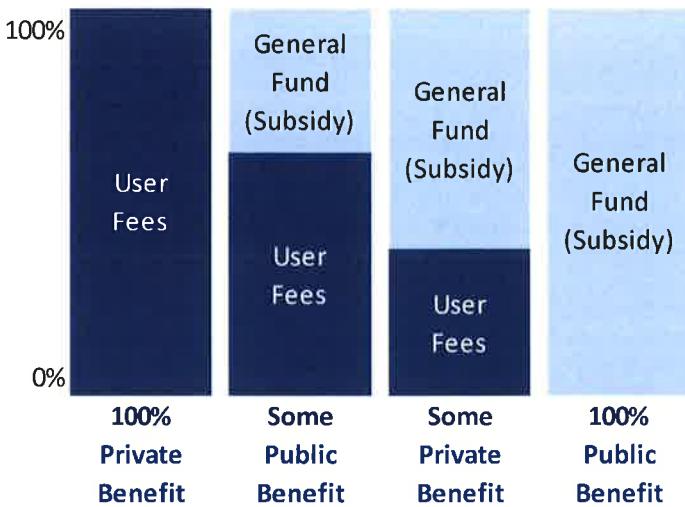

### SUBSIDIZATION

Recalling the definition of a user fee helps guide decisions regarding subsidization. The general standard is that individuals (or groups) whom receive a wholly private benefit should pay 100% of the full cost of the services. In contrast, services that are simply public benefit should be funded entirely by the general fund's tax dollars. Unfortunately, for the decision makers, many services fall into the range between these two extremes (i.e., Library and Recreation services). The graphic on the following page illustrates the potential decision basis.

Further complicating the decision, opponents of fees often assert that the activities subject to the fees provide economic, cultural, "quality of life," or other community benefits that exceed the costs to the City. It is recommended the City consider such factors during its deliberations regarding appropriate fee levels.

Of course, subsidization can be an effective public policy tool, since it can be used to reduce fees to encourage certain activities (such as compliance inspections to ensure public safety) or allow some people to be able to afford to receive services they otherwise could not at the full cost. In addition, subsidies can be an appropriate and justifiable action, such as to allow citizens to rightfully access services, without burdensome costs.

Despite the intent, it is important for the City and public to understand that subsidies must be covered by another revenue source, such as the General Fund. Therefore, the general taxpayer will potentially help to fund private benefits, and/or other City services will not receive funds that are otherwise directed to cover subsidies.

## IMPACT ON DEMAND (ELASTICITY)

Economic principles of elasticity suggest that increased costs for services (higher fees) will eventually curtail the demand for the services; whereas lower fees may spark an incentive to utilize the services and encourage certain actions. Either of these conditions may be a desirable effect to the City. However, the level of the fees that would cause demand changes is largely unknown. The Cost of Service Study did not attempt to evaluate the economic or behavioral impacts of higher or lower fees; nevertheless, the City should consider the potential impacts of these issues when deciding on fee levels.

## SUMMARY

If the City's principal goal of this study were to maximize cost recovery from user fees, Willdan would recommend setting user fees at 100% of the full cost identified in this study. However, we understand that full cost recovery and revenue enhancement is not the only goal of a cost of service study, and sometimes full cost recovery is not needed, desired, or appropriate. Other City and departmental goals, City Council priorities, policy initiatives, past experience, implementation issues, and other internal and external factors may influence staff recommendations and City Council decisions. In this case, the proper identification of additional services (new or existing services) and creation of a consistent and comprehensive fee schedule was the primary objective of this study. City staff has reviewed the full costs and identified the "recommended fee levels" for consideration by City Council. The attached appendices exhibit these unit fees individually.

The preceding sections provide background for each department or division, results of this study's analysis of their fees, and the full list of each fee's analysis.

## CITY CLERK

The City Clerk is the local official who administers democratic processes such as elections, access to City records, and all legislative actions ensuring transparency to the public. The City Clerk acts as the Compliance Officer for Federal, State and local statutes including the Political Reform Act, the Brown Act and the Public Records Act. The City Clerk's department manages public inquiries and relationships and arranges for ceremonial and official functions.

### ANALYSIS

Willdan individually reviewed the services provided by the City Clerk. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of City Clerk services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. The majority of services that fall under the City Clerk are governed by their own codes and regulations. Of the remaining fees, it is recommended that they are set at the cost recovery levels.

## City Clerk

Fee Description	Unit	Notes	Full Cost	Current Fee FY 2016/17	Cost Recovery Level (%)	Suggested Fee	Percent Change
Copies - Black & White (8.5x11 to 11x17)*	per page		Variable	\$0.25	Variable	\$0.25	0%
Copies - Color (8.5x11 to 11x17)*	per page		Variable	\$0.25	Variable	\$0.34	36%

Candidate Nomination Filing		per Election Code Section 10228, \$25 max	NA	\$25.00	NA	\$25.00	0%
Appeals to City Council - Denial, revocation, or suspension of a business permit or business license			\$433.78	New	NA	\$200.00	NA
Appeals to City Council - Zoning Related			\$433.78	New	NA	\$200.00	NA

\*Electronically Stored Records or Data Except as specifically listed in this Fee Schedule, the department may charge duplication costs of producing an electronic copy of a non-exempt public record including: All programming and computer services costs where production of the record requires data compilation, extraction or programming for all such productions, the charges shall be based on the compensation for the actual employee performing the production multiplied by the amount of time spent programming, etc. Time shall be billed in fifteen (15) minute increments with no minimum grace period

## FIRE

The Fire Department maintains the highest levels of fire and disaster preparedness, prevention, and community involvement in order to ensure the safety of both our residents and visitors. The City contracts with the Riverside County Fire Department for Fire services. Emergency Operations provides comprehensive emergency services utilizing a highly trained work force, progressive technology, and modern equipment to provide Fire and Paramedic services. The Lake Elsinore Fire Department is dedicated to protecting life, property, and the environment throughout the City, accomplished by a comprehensive emergency service response program utilizing responsible fiscal management, a highly trained work force, progressive technology, and modern equipment.

The Fire Prevention Division is to preserve and enhance the quality of life for the citizens of Lake Elsinore through the application of a comprehensive fire and hazard program.

## ANALYSIS

Willdan individually reviewed the services and programs associated with the Fire Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Fire services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee would recover the costs associated with the requested service. The suggested fees represent 100% cost recovery which would result in an average fee increase of 20%. On an individual fee basis, there would be an increase for 27 fees, a decrease for 16 fees, 3 fees would remain as currently set, and 14 new fees will be added. A majority of the Weed Abatement fees are provided from a 3<sup>rd</sup> party and it is recommended that the City set Weed Abatement services at 100% cost recovery for those 12 fees.

## COMMUNITY SERVICES

The Community Services Department provides a variety of programs that educate, entertain, and enrich the community. The Department delivers special events for all ages. They arrange for services and programs that are needed by those with special needs, teens, and seniors. The Department provides professional leadership through recreational programs, services, and events that enhance the quality of life in the community.

Included in this section's analysis is the Lake Division. Lake Elsinore is ideal for motor boating, jet skiing, waterskiing, wakeboarding, kayaking, and fishing. It boasts public beaches with picnic and shade features, plenty of safe easy-access parking, a three-mile levee for hiking, nature watching, and fishing, and a tournament channel for professional ski instruction and club and pro competitions.

### ANALYSIS

Willdan individually reviewed the services and programs associated with Community Services. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Community Service programs encompassed special events, facility rentals, park rentals, other community services, and the Lake. The analysis for most service groups involved using a combination of programmatic methods and the case study method so that the estimated cost per participant in a given program could be determined. The fees under the Lake Division are determined by market forces for the use of publicly owned land. As a whole the Lake Division is only at around a 20% cost recovery level, and the suggested fees are not intended to achieve cost recovery.

The analysis found that the City was recovering less than full cost for most Community Services. It is generally accepted that some Community Service programs provide a measure of public benefit to the residents and City as a whole. In addition, cities generally want to ensure that their programs and services remain affordable to the community at large, and that the programs remain competitive with surrounding jurisdictions. With those factors in mind, the department has provided two recommendations for cost recovery levels. The first is the optimal recovery level, which acknowledges the points described above, but provides a greater level of cost recovery for services that the department would like to work towards as a goal. The second is the suggested cost recovery level, which, while it includes increases in fees as a whole, the increases are more modest than the optimal cost recovery goal of the department. Please refer to the tables after this section for the cost recovery level detail for both the optimal and suggested recovery levels for each individual service.

## Community Services

## BUILDING

The Building Division is responsible for enforcing the California Building and Safety codes along with State laws; performing plan checks on construction documentation to ensure that project proposals meet City codes; distributing plans for review by other agencies or City departments; issuing building permits after plans are completed and corrected; completing final inspections; and issuing certificates of occupancy. The Division also performs special inspections; implements certain State Laws such as the California Disabled Access Regulations; is responsible for updating Building and Fire codes required by the State of California; provides guidance to the general public and development community regarding the Uniform Building Codes and project applications.

## ANALYSIS

Willdan individually reviewed the services and programs associated with the Building Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Building relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. It is recommended that the City set Building and services at 100% cost recovery. On an individual fee basis, there would be an increase for 83 fees, a decrease for 10 fees, 6 fees would remain as currently set, and 5 new fees are added.

In addition to the fees listed under Building, the Building Permit fees are also provided by this department. For the Building Permit fees, valuation is used as a proxy for measuring the amount of effort needed to provide services. This method is an industry standard and is widely used by other jurisdictions to evaluate the cost of providing service. It is generally understood that the larger and more complex a project is, more time and effort that is required to provide the service. Project valuation also follows that trend, and so by using a combination of either project valuation or historical revenue figures along with a multiplier or cost recovery analysis for historical and anticipated future trends, current cost recovery along with variability in charges due to project type and scale is determined. It is recommended the department implement the most up to date valuation tables, and perform the same update on an annual basis to keep up with the changes in construction costs. In order to reach full cost recovery, it is estimated that there would need to be a 43% increase in the fee amounts listed in the modified fee table. Staff is recommending a 10% increase to the Building Permit tables which would bring the cost recovery level for these services to 76%.

## Building Fees

Group	Fee Description	Unit	Notes	Full Cost	Current Fee FY 2016/17	Targeted Cost Recovery Level (%)	Suggested Fee	Percent Change
<b>Electrical Permits</b>								
Permit Issuance	1. For the issuance of each permit 2. Professional Development Fee	each Permit		\$54.41 NA	\$30.00 \$5.00	100% NA	\$45.00 \$5.00	50% 0%
Permit Issuance	1. The following fees shall include all wiring and electrical equipment in or on each building, or other electrical equipment on the same premises constructed at the same time							
System Fee Schedule								
System Fee Schedule	a. For new multifamily residential buildings (apartments and condo-minimums) having three or more living units not including the area of garages, carports and other noncommercial automobile storage areas constructed at the same time, per square foot.	per sq ft	units of 4	\$0.50	\$0.04	100%	\$0.06	50%
System Fee Schedule	b. For new single and two family residential buildings not including the area of garages, carports, and other minor accessory buildings constructed at the same times, per square foot	per sq ft		\$0.37	\$0.05	100%	\$0.08	50%
System Fee Schedule	c. For other types of residential occupancies and alterations, additions and modifications to existing residential buildings, use the UNIT FEE SCHEDULE							
Private Swimming Pools	1. For new private, residential, inground, swimming pools for single family and multifamily occupancies including a complete system of necessary branch circuit wiring, bonding, grounding, underwater lighting, water pumping and other similar electrical equipment directly related to the operation of a swimming pool, each			\$714.91	\$44.25	100%	\$66.38	50%
Private Swimming Pools	2. For other types of swimming pools, therapeutic whirlpools, spas and alterations to existing swimming pools, use the UNIT FEE SCHEDULE							
Temporary Power Service	1. For temporary service power pole or pedestal including all pole or pedestal mounted receptacle outlets and appurtenances, each			\$77.65	\$22.00	100%	\$33.00	50%
Temporary Power Service	2. For a temporary distribution system and temporary lighting and receptacle outlets for construction sites, decorative light, Christmas tree sales lots, firework stands, etc., each			\$131.21	\$11.00	100%	\$16.50	50%
Unit Fee Schedule: Receptacle, Switch and Lighting Outlets	1. For receptacle, switch, lighting or other outlets at which current is used or controlled, except services, feeders and meters. a. First 20, each	each			\$1.00	100%	\$1.50	50%
	Note: For multioutlet assemblies, each 5 feet or fraction thereof may be considered as one outlet.							

## Building Fees

Group	Fee Description	Unit	Notes	Full Cost	Current Fee FY 2016/17	Targeted Cost Recovery Level (%)	Suggested Fee	Percent Change
<b>Electrical Permits</b>								
Unit Fee Schedule: Receptacle, Switch and Lighting Outlets	b. Additional outlets, each	each	Note: For multioutlet assemblies, each 5 feet or fraction thereof may be considered as one outlet	\$3.88	\$0.65	100%	\$0.98	50%
Unit Fee Schedule: Lighting fixtures	1. For lighting fixtures, sockets or other lamp holding devices.							
Unit Fee Schedule: Lighting fixtures	a. First 20, each	each		\$3.88	\$1.00	100%	\$1.50	50%
Unit Fee Schedule: Lighting fixtures	b. Additional fixtures, each	each		\$3.88	\$0.65	100%	\$0.98	50%
Unit Fee Schedule: Lighting fixtures	c. For pole or platform mounted lighting fixtures, each	each		\$4.55	\$1.00	100%	\$1.50	50%
Unit Fee Schedule: Lighting fixtures	d. For theatrical type lighting fixtures or assemblies, each	each		\$5.22	\$1.00	100%	\$1.50	50%
Unit Fee Schedule: Residential Appliances	1. For fixed residential appliances or receptacle outlets for same, including wall mounted electric ovens; counter mounted cooking tops; electric ranges; self contained room, console, or through wall air conditioners; space heaters; food waste grinders; dishwashers; washing machines; water heaters; clothes dryers or other motor operated appliances not exceeding one horsepower (HP) in rating, each	each		\$91.05	\$4.25	100%	\$6.38	50%
Unit Fee Schedule: Nonresidential Appliances	1. For fixed nonresidential appliances and self contained factor. Wired, nonresidential appliances not exceeding one horsepower (HP), kilowatt (kW), or kilovolt amperes (kVA) in rating including medical and dental devices; food, beverage, and ice cream cabinets; illuminated show cases; drinking fountains; vending machines; laundry machines; or other similar types of equipment, each	each	Note: For other types of air conditioners and other motor driven appliances having larger electrical ratings, see POWER APPARATUS.	\$91.05	\$4.25	100%	\$6.38	50%
Unit Fee Schedule: Power Apparatus	1. For motors, generators, transformers, rectifiers, synchronous converters, capacitors, industrial heating, air conditioners and heat pumps, cooking or baking equipment and other apparatus, as follows: Rating in horsepower (HP), kilowatts (kW), kilovolt amperes (kVA), or kilovolt amperes reactive (kVAR):							
Unit Fee Schedule: Power Apparatus	a. Up to and including 1, each	each	These fees include all switches, circuit breakers, contractors, thermostats, relays and other directly related control equipment	\$115.17	\$4.25	100%	\$6.38	50%
Unit Fee Schedule: Power Apparatus	b. Over 1 and not over 10, each	each	These fees include all switches, circuit breakers, contractors, thermostats, relays and other directly related control equipment.	\$128.55	\$11.00	100%	\$16.50	50%

## Building Fees

Group	Fee Description	Unit	Notes	Full Cost	Current Fee FY 2016/17	TARGETED COST RECOVER LEVEL (%)	Suggested Fee	Percent Change
<b>Electrical Permits</b>								
Unit Fee Schedule: Power Apparatus	c. Over 10 and not over 50, each	each	These fees include all switches, circuit breakers, contractors, thermostats, relays and other directly related control equipment.	\$128.55	\$22.00	100%	\$33.00	50%
Unit Fee Schedule: Power Apparatus	d. Over 50 and not over 100, each	each	These fees include all switches, circuit breakers, contractors, thermostats, relays and other directly related control equipment.	\$128.55	\$44.25	100%	\$66.38	50%
Unit Fee Schedule: Power Apparatus	e. Over 100, each	each	Note: For equipment or appliances having more than 1 motor, transformer, heater, etc., the sum of the combined ratings may be used. These fees include all switches, circuit breakers, contractors, thermostats, relays and other directly related control equipment.	\$409.88	\$66.50	100%	\$99.75	50%
Unit Fee Schedule: Busways	1. For trolley and plug in type busways, each 100 feet or fraction thereof	each 100 ft	Note: An additional fee will be required for lighting fixtures, motors and other appliances that are connected to trolley and plug in type busways. No fee is required for portable tools.	\$1.69	\$6.50	100%	\$1.69	-74%
Unit Fee Schedule: Signs, Outline Lighting and Marquees	1. For signs, outline lighting systems or marquees supplied from one branch circuit, each	each		\$168.71	\$22.00	100%	\$33.00	50%
Unit Fee Schedule: Signs, Outline Lighting and Marquees	2. For additional branch circuits within the same sign, each	each		\$128.55	\$4.25	100%	\$6.38	50%
Unit Fee Schedule: Services	1. For services of 600 volts or less and not over 200 amperes in rating, each	each		\$168.71	\$27.25	100%	\$40.88	50%
Unit Fee Schedule: Services	2. For services of 600 volts or less and over 200 amperes to 1000 amperes in rating	each		\$220.93	\$55.50	100%	\$83.25	50%
Unit Fee Schedule: Services	3. For services over 600 volts or over 1000 amperes in rating, each	each		\$220.93	\$111.00	100%	\$166.50	50%
Unit Fee Schedule: Miscellaneous Apparatus, Conduits and Conductors	1. For electrical apparatus, conduits and conductors for which a permit is required but for which no fee is herein set forth	each	Note: This fee is not applicable when a fee is paid for one or more services, outlets, fixtures, appliances, power apparatus, busways, sign or other equipment.	\$208.87	\$16.25	100%	\$24.38	50%
Other Inspections and Fees	1. Inspections outside normal business hours	per hour		\$240.96	\$110.00	100%	\$165.00	50%
Other Inspections and Fees	2. Reinspection fees as assessed under provisions of the code	per hour	110.00 per hour per inspection after 2	\$200.32	\$60.00	NA	\$103.00	72%
Other Inspections and Fees	3. Inspections for which no fee is specifically indicated (1/2 hr minimum)	per hour	45.00 per hour	\$160.64	\$45.00	100%	\$67.50	50%
Other Inspections and Fees	4. Additional plan review required by changes, additions, or revisions to approved plans (1/2 hr minimum)	per hour	55.00 per hour	\$307.60	\$55.00	100%	\$82.50	50%

## PLANNING

The Planning & Zoning Division provides a variety of planning services to the community, including reviewing and processing of development proposals for conformance with City policies and regulations. In addition, staff provides support to the Planning Commission and City Council and assists the general public and development applicants regarding planning information and application process.

## ANALYSIS

Willdan individually reviewed the services and programs associated with the Planning Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of services in Planning fees relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis has shown that in general Planning services are currently under recovering the cost of proving services. The suggested fees represent 100% cost recovery which would result in an average fee increase of 44%. The result would be an increase in 39 fees, decrease for 1 fee, 24 fees would remain as currently set, and 5 new fees would be added.

## ENGINEERING

The Engineering Division is responsible for the development of public infrastructure and all physical improvement within the public right-of-way. These improvements include the development of public streets (roadways, curbs, gutters, and sidewalks), traffic controls including: signal, striping, signage, sewer systems, and storm drains. The division provides public counter support, development review for grading, drainage, traffic issues, and timely inspections of Capital Improvement and private development Projects.

## ANALYSIS

Willdan individually reviewed the services and programs associated with the Engineering Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Engineering services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. This analysis has shown that most of the fees are not currently achieving full cost recovery. It is recommended that Engineering fees be set at a 100% cost recovery levels. On an individual fee basis, there would be an increase for 37 fees, a decrease for 3 fees, 17 fees would remain as currently set, and 17 new fees are added.

## VEHICLE ABATEMENT

Vehicle Abatement is a program within Code Enforcement. The programs provides for the removal of vehicles that are abandoned or stored in the public right-of-way, unregistered, or inoperative.

### ANALYSIS

Willdan individually reviewed the services and programs associated with Vehicle Abatement. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Vehicle Abatement fees relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. This analysis has shown that most of the fees are not currently achieving full cost recovery. It is recommended that all fees be set to full cost recovery.

## Vehicle Abatement

Fee Description	Unit	Current Fee FY 2013/14		Cost Recovery Level (%)	Suggested Fee	Percent Change
		Full Cost				
Initial Complaint		\$79.18	\$97.00	100%	\$79.00	-19%
First Inspection		\$198.24	\$97.00	100%	\$198.00	104%
Subsequent Follow-Up Inspection		\$154.69	\$16.00	100%	\$154.00	863%
Tow Vehicle	each	\$890.40	\$69.00	100%	\$890.00	1190%
Abatement Hearing		\$1,080.70	New	100%	\$1,080.00	NA

## CODE ENFORCEMENT

Code Enforcement Division provides a variety of services to the community, including monitoring regional agencies and programs, and coordinating with outside agencies to protect the quality of life within the community. The Division provides commercial and residential neighborhood preservation to ensure a high quality standard of living and sustainability in communities. The Code Enforcement Division identifies substandard housing to promote life, health and safety standards.

### ANALYSIS

Willdan individually reviewed the services and programs associated with Code Enforcement. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Code Enforcement services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. All fees listed are identified as new fees, and it is recommended that all services be set at full cost recovery.

**APPENDIX A – TOTAL ALLOWABLE COST TO BE RECOVERED**

Below are the total allowable costs that may be recovered through User Fees; however, only a percentage of the total allowable cost is realized as staff not only works on services related to User Fees, but also works on an array of other City functions during the operational hours of the City.

## Lake Elsinore - User Fee

Senior Center	137,630	126,449	91.9%	27.0%

## APPENDIX B – FULLY BURDENED HOURLY RATES

Below are fully burdened hourly rates of staff positions that provide for the services detailed in the sections above. The FBHRs were used to determine the full cost of each service. They include the salary and benefit costs for each position as well as all applicable overhead amounts for each position. For positions in central service departments, such as the City Clerk and Finance, the hourly rates do not include central service overhead, as the overhead of central service departments is recovered through the cost allocation plan, of which they are a part. When a central service department position works on a fee or project in the purview of an operating department, the overhead rates of the operating department (shown in Appendix A) will be applied to that central service positions' salary and benefit rate for full cost recovery. For any user fee service request that is outside the scope of the fees detailed in the sections above, or for services for which there is no fee currently set, the City can charge up to the full cost of the FBHR for personnel involved, as well as any third party or material cost involved.
