

## **REPORT TO CITY COUNCIL**

**To:** Honorable Mayor and Members of the City Council

**From:** Grant Yates, City Manager

**Prepared By:** Brad Fagrell, City Engineer

**Date:** October 9, 2018

**Subject:** Construction Contract Award for Emergency Work for the Holy Fire Storm Preparedness to Edmondson Construction Company

### **Recommendation**

1. Award the Public Works Construction Agreement for Emergency Work for the Holy Fire Storm Preparedness to Edmondson Construction Company
2. Authorize the City Manager to execute the Agreement in the amount of \$80,498 to Edmondson Construction Company

### **Background**

The Holy Fire is among one of the worst disasters to affect the City of Lake Elsinore. Beyond the devastation to our hillside, the fire has left behind many impacts on our community. The City of Lake Elsinore recognizes the severe impact winter storms can have on the burn scar area; flooding, mud and debris flows can happen at any time. A potentially significant storm is expected to happen starting October 3, 2018.

### **Discussion**

This emergency project is to install an approximate 1,300' long earthen berm along the southerly edge of the creek at the entrance to Rice Canyon (north of the intersection of Dale Court and Lincoln Street, adjacent to Rice Canyon Elementary School) in the City of Lake Elsinore, Riverside County, California. The berm will be constructed by pushing native sediments from the centerline of the creek in a southerly direction and up-gradient to form a berm to help keep expected debris flows within the creek/channel and away from the elementary school and adjacent homes. The Holy fire burned the creek's watershed and severe debris flows are expected when the creek flows again.

**Fiscal Impact**

Funding for this emergency project has been allocated from the General Fund.
