

Proposed 5.75-acre HMMP Area

HMMP_Ac

- 5.75-acre Mitigation for Boat Launch Project
- 0.88-acres for Additional revegetation contiguous with the 2 mitigation polygons (70-ft buffer to each side of Lucerne right of way)

NOTE: Flow for water should be maintained for any future construction of Lucerne, to maintain hydrological function of the 5.75 acre Mitigation Area, and, appropriate BMPs for water management to avoid and mitigate any potential negative impacts to the preserved habitat, including erosive flows from road construction.
