

## **REPORT TO CITY COUNCIL**

**To: Honorable Mayor and Members of the City Council**

**From: Grant Yates, City Manager**

**Prepared By: Remon Habib, City Engineer**

**Date: October 13, 2020**

**Subject: Professional Services Agreement for I-15 Main Street Interchange Improvements – Construction Management**

### **Recommendation**

Authorize the City Manager to execute a Professional Services Agreement with FCG Consultants in the amount of \$743,491.35 plus an additional 10% contingency for I-15 Main Street Interchange Improvements – Construction Management in final form as approved by the City Attorney.

### **Background**

In May of 2019, the City completed the final design of the Main Street Interchange improvements project. The project includes 3 Traffic signals, road widening under the freeway, on-ramp metering, and structural walls. The City has received the Caltrans encroachment permit and is in the process of completing a freeway maintenance agreement with Caltrans in order to move forward with letting the project out for bid. The Project has a funding agreement with RCTC to fund construction, post-design services, and construction management contracts.

The project is anticipated to be let out for bid in the fall of 2020 and construction to be completed by the Spring of 2022. The agreement stipulates that \$5,483,000 of Measure A Regional Arterial (MARA) funds will be allocated by RCTC towards the construction of the I-15 Main Street Improvements Project. The funding was approved by the RCTC commission on the June 10<sup>th</sup> meeting. The City has also received \$476,000 in additional funds from a cooperative agreement with CalTrans. Combined funding will be utilized for construction tasks as well as Construction management and any additional design services needed to complete the project.

### **Discussion**

Final Design on the project has been completed in May of 2019. FCG Consultants will provide professional services related to the construction management of the I-15 Main Street Interchange improvement projects. Scope of work includes services of a resident engineer, construction inspection, material testing, and document control per the standards of the California Department of Transportation, CalTrans.

### **Fiscal Impact**

The fiscal impact is \$743,491.35 plus an additional \$74,349 in contingency which will be reimbursed by the Funding Agreement between the City and RCTC.
